Devices running Windows (and Android) are vastly more likely to get hit with a malware infestation than Macs, simply because the macOS operating system is better at maintaining security.. Smart Mac users don't rely strictly on the OS They install a macOS-centric antivirus utility.. Even Macs Need Antivirus Protection It never fails If you post on a help forum about some computer problem you're having, some genius is sure to contribute, 'Get a Mac!' Yeah, it's not much help, but there is a nugget of value at the core of that advice. [Pc Card For Mac](#)
